VISUALIZING THE PATTERN OF DISEASE

AESKU. DIAGNOSTICS
THE DIAGNOSTIC TOOL THAT WORKS

AESKUSLIDES®

VISUALIZING THE PATTERN OF DISEASE

The AESKUSLIDES® IFA product line comprehends a complete panel of cell and tissue slides for the detection of the major autoantibodies and corresponding titrations.

The AESKUSLIDES®, available as complete kits or individual slides, can also be processed using your reagent system.

- Easy handling: ready to use reagents and controls
- All kits share "THE ONE" Aesku concept: the same test protocol for all available tests
- Vacuum sealed slides with long shelf life
- Strong hydrophobic Teflon® mask coating the slides: avoid sample cross contamination and allow minimal conjugate volumes
- Counterstain (Evans Blue) available separately from the conjugate
- Mounting medium especially formulated for manual use or automatic dispensing by the HELMED® processor

DESIGNED FOR AUTOMATION

The AESKUSLIDES® can be easily adapted to any IFA processor and are pre-programmed and validated on the AESKU.HELMED® processor.

Furthermore, all AESKUSLIDES® reagent, calibrator and control vials fit directly into the HELMED® standard reagent racks.

Screening and titration can be done simultaneously with the complete automation of all IFA processing steps (including time controlled counterstain and mounting medium addition) using the AESKUSLIDES® on the AESKU.HELMED® processor.

As easy as ABC: Load your slides, samples, controls and reagents, press start...put the coverslip and ready for the microscope!

The AESKUSLIDES® line is available as complete kits or individual slides that can be processed using your reagent system.

Kit Code Nr.	Product	Determinations/Kit	Slides Code Nr.	Presentation
K 51.100	HEp - 2	120 tests 10 slides w/ 12 wells	S 51.100	12 wells
K 53.100	Crithidia lucilliae	100 tests 10 slides w/ 10 wells	S 53.100	10 wells
K 55.050	Rat Kidney/Stomach	50 tests 10 slides w/ 5 wells	S 55.050	5 wells
K 517.050	Rat Liver/Kidney/Stomach	50 tests 10 slides w/ 5 wells	S 517.050	5 wells
K 518.050	Mouse Liver/Kidney/Stomach	50 tests 10 slides w/ 5 wells	S 518.050	5 wells
K 512.050	EMA (endomysium)	50 tests 10 slides w/ 5 wells	S 512.050	5 wells
